

# Maya Lim

Customer Operations Specialist | Aspiring Junior Data Analyst

Singapore | maya.lim@example.com

## PROFESSIONAL SUMMARY

Customer operations professional with four years of experience in service reporting and process improvement. Recently completed introductory SQL and Python training and an independent data analysis project. Seeking an entry-level data analyst role; available for hybrid work in Singapore.

## SKILLS

**Work experience:** Microsoft Excel, pivot tables, customer support, CRM reporting, stakeholder communication

**Foundational training:** SQL SELECT statements and JOINS, Python basics, pandas, Power BI

**Languages:** English (fluent), Malay (fluent)

## WORK EXPERIENCE

### Customer Operations Specialist | Example Service Centre

Singapore | September 2022 - August 2026

- Managed approximately 40 customer enquiries per day and maintained accurate CRM records.
- Prepared weekly Excel reports covering ticket volumes, response times and common complaint categories.
- Redesigned a reporting template, reducing weekly preparation time from three hours to two hours.
- Trained two new team members in customer support procedures.

## INDEPENDENT PROJECT

### Retail Sales Dashboard | April 2026 - June 2026

- Analysed a public practice dataset of 2,000 sales rows using Excel and basic SQL.
- Used Power BI to visualise monthly revenue and product categories.
- Used a short pandas script to identify missing values; documented the cleaning decisions.
- This was a personal learning project, not a production deployment or paid analyst position.

## EDUCATION AND TRAINING

### Diploma in Business Administration | Example Business College

Singapore | April 2019 - March 2022

### Introduction to Data Analysis | Example Learning Academy

Completed June 2026 | 40-hour course; certificate of completion

## CAREER OBJECTIVE

Transition into junior reporting or data analysis work. No professional software engineering or machine learning experience.
