

Evan Tan

Operations Technology Coordinator

evan_tan@example.com | Singapore

PROFILE

Operations coordinator with exposure to software delivery through collaboration with engineers. Seeking an associate technology role.

EXPERIENCE

Cedar Quay Logistics | Operations Technology Coordinator | Jan 2023 - Aug 2026

Worked with the team behind a Node.js booking service; my contribution was collecting warehouse requirements and checking screens, not writing production code.

Supported an AWS migration by scheduling user acceptance sessions. Observed deployments but did not provision cloud resources.

Helped improve weekly reporting; the team reported a 20% reduction in handling time, but my individual contribution was not measured.

Occasionally adjusted a spreadsheet macro using a colleague's template.

SKILLS

Excel, requirements notes, user acceptance testing, stakeholder coordination. Introductory JavaScript self-study; no independently delivered software project.

EDUCATION

Diploma in Business Operations | Northbridge Institute | 2022
