

Leo Chen

Backend Software Engineer

leo_chen@example.com | Singapore

PROFILE

Backend engineer building server-side JavaScript services and relational data workflows.

EXPERIENCE

Silver Reed Software | Backend Engineer | Jun 2023 - Aug 2026

Built HTTP endpoints using the JavaScript runtime Node.js and the Express framework.

Used typed JavaScript (TypeScript) to validate request contracts.

Designed relational tables and wrote joins in PostgreSQL; added indexes to reduce a report query from 2.4 to 0.9 seconds.

Implemented a Redis in-memory cache and asynchronous job processing.

Wrote automated unit checks with Jest and reviewed changes through Git pull requests.

Packaged services into Docker containers and used a continuous integration pipeline in GitHub Actions.

PROJECT

Library lending API | Personal project | 2023

Implemented REST endpoints, token-based sign-in and pagination. Tested locally; no claimed commercial users.

EDUCATION

BSc in Information Systems | Westhaven College | 2023
